

Klímová B., Divíšek J., Večeřa M., Chytrý M., Danihelka J., Kaplan Z., Novotný P., Skokanová H., Wild J. & Axmanová I. (2025) Spatial patterns of species richness in the Czech flora: effects of sampling intensity, environment and landscape history. – Preslia 97: 541–566.

Supplementary Fig. S2. Spearman rank correlation matrix of dependent and independent variables used in the spatial error models, along with geographical coordinates (X: longitude, Y: latitude). Negative correlation coefficients are displayed in blue cells, while positive coefficients are shown in red cells. Statistically non-significant correlations ($p > 0.05$) are indicated by red strikethroughs on the corresponding coefficients.
