**Škornik S. & Pipenbaher N. (2025) Patterns in clonal traits in semi-dry calcareous grasslands in Slovenia. – Preslia 97: 567–588.**

**Supplementary Fig. S11.** Changes in agricultural practice, such as switching from extensive mowing to grazing, alter the floristic and functional composition, as well as the vegetation structure of the grassland (meadow in the foreground, pasture in the background; Haloze region) (photo: S. Škornik).
