Vymazalová M., Skokanová H., Divíšek J. & Axmanová I. (2026) Does land-use continuity matter? The impact of almost two centuries of land-use history on temperate grasslands. – Preslia 98: 281–302.

Supplementary Fig. S4. Proportions of predominant land-use categories (grasslands, arable land and forest) in buffers (landscape scale i.e. a buffer of 1 km and local scale i.e. a buffer of 300 m) of pioneer vegetation of sandy and shallow soils (*Koelerio-Corynephoretea*) in five time periods (1840s, 1870s, 1950s, 1990s and 2006).
