**Electronic Appendix 2.** – Alleles of 5 microsatellite loci and ploidy level of populations, taxa and individuals investigated. In brackets are alleles not occurring in all individuals of the population. In bold are individual-, taxon or geographic-group specific alleles or those alleles which are markers for gene flow. Unique alleles are in italics. \* Ploidy as published in Feulner et al. (2013) \*\*Ploidy deducted from highest number of alleles per locus.
