

Erratum to:

Dítě D., Šuvada R., Tóth T. & Dítě Z. (2023) Inventory of the halophytes in inland central Europe. – Preslia 95: 215–240.

In caption to Table 1 (p. 223), the description of categories Ia and Ib was confused. Ia should refer to ‘conditioned obligate halophyte’ and Ib to ‘regional obligate halophyte’. The correct version of Table 1 caption is shown below.

Table 1. Checklist of species in saline habitats in central Europe with the assigned salt number on a nine-point scale and category of salt tolerance (I – obligate halophyte, Ia – conditioned obligate, and Ib – regional obligate halophyte, II – facultative halophyte, III – accessory species) in alphabetical order.

In addition, on p. 225, *Sedum caespitosum* salt tolerance category was erroneously presented as Ib. The correct category for this species is II (facultative halophyte).
